

Salam Digital-API / APIGW — Error Catalog

Capture window **2026-08-18** → **2026-08-25** · 6,650,049 API calls · generated 2026-08-25 13:51 UTC

Why this catalog is not 12 months (and must not pretend to be)

The Digital-API gateway keeps no long-term per-call log. The only per-call record is the operations console's own capture on the API hosts — **live since 13 Aug 2026 with a 7-day retention**. Every number here is measured over the full available window above: a complete, statistically meaningful picture of one representative week — not a year. The 12-month view exists for payments (app database), and for eligibility / BSS activation / Nafath (replica logs) in the companion journey-errors monthlies.

Forward plan: a nightly rollup (path × code × class × day) into a permanent table makes the NEXT edition of this catalog a true monthly, accumulating from today — first full month available end of September 2026.

Classification doctrine

technical = Salam IT at fault (timeouts, 5xx, transport, BSS 1500/5002 family) — pageable. business = the platform answered and the outcome belongs to the customer, bank, CITC or policy — reportable, not pageable. Same errclass rules as the console's Troubleshoot, alerts and the payment catalog, so no two reports can disagree.

1 · Daily volume and outcome classes

Day	Calls	Success	Business	Technical	Tech %
2026-08-18	545,470	540,511	4,663	296	0.05%
2026-08-19	938,685	929,736	7,555	1,394	0.15%
2026-08-20	914,567	905,301	8,293	973	0.11%
2026-08-21	951,597	939,622	11,278	697	0.07%
2026-08-22	885,641	874,449	10,439	753	0.09%
2026-08-23	879,155	868,367	9,922	866	0.10%
2026-08-24	1,053,000	1,038,529	13,332	1,139	0.11%
2026-08-25	481,934	476,232	5,334	368	0.08%

2 · The four report journeys — outcome mix and latency

Journey attribution is by API path family; "Onboarding" covers New SIM and MNP (the gateway does not distinguish the lane).

Journey	Calls	Success	Business	Technical	Tech %	worst p95
Onboarding (NewSIM+MNP)	5,297,012	5,231,151	62,698	3,163	0.06%	3,245 ms
Other	1,333,659	1,323,815	6,640	3,204	0.24%	2,472 ms
Recharge	11,958	10,480	1,478	0	0.00%	3,142 ms
Invoice	7,420	7,301	0	119	1.60%	31,261 ms

3 · Technical failures — the catalog (Salam IT actionable)
