

Salam — Journey Errors Catalog

2025-09 → 2026-08 · onboarding backend failures across 12 months · companion to the Payment-Errors Catalog

Scope & sources — what is (and is not) in this report

In: the three failure families with true 12-month history on the application replica — **Eligibility** (Semati checks), **BSS Activation**, and **Nafath identity**. These are onboarding-stage systems, so they tell the New SIM and MNP story end to end. **Recharge & Invoice:** these journeys have no eligibility/BSS/Nafath stage — their backend record is the payment itself, fully covered for the same 12 months in the Payment-Errors Catalog and the monthly UPG workbooks. Stated here so nobody looks for missing pages.

Excluded — APIGW/Digital-API: per-call gateway records exist only since 13 Aug 2026 (7-day retention). A separate one-week APIGW catalog exists; its history accumulates monthly from Sep 2026 onward.

Classification doctrine

technical = Salam IT at fault (1500/5002/timeouts/transport — pageable). **business** = the platform delivered a verdict that belongs to the customer, CITC or policy (reportable, not pageable). Nafath terminal statuses (failed/expired/rejected/cancelled) are ALWAYS business: a terminal status proves the request was delivered and CITC answered — "failed" is the customer failing verification in the Nafath app, typically a wrong number choice.

1 · Onboarding funnel per month (per lane)

id_submitted = customer entered National ID + nationality (the corrected pre-eligibility definition); denied = submitted AND refused. pre-elig drop = created – id_submitted (browsing abandonment, NOT refusals).

New SIM

Month	Created	Pre-elig drop	ID submitted	Eligible	Denied	Activated
2025-09	69,796	43,808	25,988	25,496	492	11,483
2025-10	70,162	43,157	27,005	26,533	472	11,598
2025-11	58,853	35,654	23,199	22,856	343	9,699
2025-12	107,441	85,105	22,336	21,818	518	8,814
2026-01	87,055	65,628	21,427	21,044	383	9,579
2026-02	69,213	53,836	15,377	15,040	337	6,982
2026-03	97,453	81,445	16,008	15,639	369	6,329

2026-08	179,877	163,236	16,641	15,856	785	6,054

MNP

Month	Created	Pre-elig drop	ID submitted	Eligible	Denied	Activated
2025-09	19,228	1,584	17,644	17,537	107	6,454
2025-10	19,759	1,427	18,332	18,246	86	6,741
2025-11	18,388	1,106	17,282	17,216	66	6,242
2025-12	17,635	1,668	15,967	15,864	103	5,555
2026-01	14,920	1,496	13,424	13,332	92	5,217
2026-02	11,588	1,231	10,357	10,252	105	4,212
2026-03	13,729	1,924	11,805	11,687	118	4,108
2026-04	19,500	6,097	13,403	13,266	137	5,020
2026-05	15,460	1,996	13,464	13,359	105	4,896
2026-06	17,282	2,651	14,631	14,490	141	5,475
2026-07	20,580	5,451	15,129	14,927	202	5,772
2026-08	15,308	4,471	10,837	10,689	148	3,816

2 · Eligibility (Semati) — 12 months

Month	Checks	Failures	Business	Technical	Tech %
2025-09	83,895	21,200	20,960	240	1.1%
2025-10	87,815	23,212	23,020	192	0.8%
2025-11	85,422	23,709	23,690	19	0.1%
2025-12	98,086	31,192	30,430	762	2.4%
2026-01	134,277	57,241	57,209	32	0.1%
2026-02	117,073	45,419	45,364	55	0.1%
2026-03	116,899	40,892	40,881	11	0.0%
2026-04	126,320	45,186	45,149	37	0.1%
2026-05	141,304	56,249	56,215	34	0.1%
2026-06	129,551	51,551	50,799	752	1.5%
2026-07	166,687	71,199	61,803	9,396	13.2%
2026-08	116,063	44,051	44,010	41	0.1%

Top failure codes across the year

Code	Class	Count (12mo)	Share of top
605	business	459,007	89.8%
702	business	32,103	6.3%
(none)	technical	7,453	1.5%
715	technical	7,452	1.5%
5002	technical	3,820	0.7%
747	business	937	0.2%
719	business	198	0.0%
718	business	65	0.0%
5003	technical	33	0.0%
701	business	22	0.0%
709	business	11	0.0%

605 (business refusal) dominates every single month; the technical family (5002/715) concentrates in May–Jul 2026 — the Semati/TCC degradation the console alerted on live.

3 · BSS Activation — 12 months

Month	Calls	Failures	Business	Technical	Tech %	order-FK
2025-09	50,748	16,970	16,732	237	1.4%	0%
2025-10	55,329	18,894	18,780	114	0.6%	0%
2025-11	55,584	22,110	21,978	132	0.6%	0%
2025-12	49,066	16,837	16,461	376	2.2%	0%
2026-01	45,850	14,245	14,212	33	0.2%	0%
2026-02	34,547	11,190	11,162	28	0.3%	0%
2026-03	34,347	11,855	11,834	21	0.2%	0%
2026-04	33,399	7,921	7,903	18	0.2%	0%
2026-05	33,205	8,587	8,567	20	0.2%	0%
2026-06	36,628	10,133	9,977	151	1.5%	0%
2026-07	42,758	13,432	11,762	1,665	12.4%	0%
2026-08	29,771	9,587	9,527	60	0.6%	0%

order-FK = share of activation rows linkable to an order (lane attribution is only trustworthy where this is high — stated, not guessed).

Top failure families across the year

API	Code	Class	Count (12mo)
/semati/transfer-operator	727	business	35,328
/semati/new-mobile-number	726	business	23,015

4 · Nafath identity — 12 months (all business, per doctrine)

Month	Requests	Failed*	Rate	expired	rejected	failed	cancelled	denied
2025-09	87,729	926	1.1%	0	617	309	0	0
2025-10	103,767	7,498	7.2%	0	504	6,994	0	0
2025-11	98,580	2,282	2.3%	0	506	1,776	0	0
2025-12	81,311	1,564	1.9%	0	387	1,177	0	0
2026-01	76,274	2,289	3.0%	0	375	1,914	0	0
2026-02	62,240	744	1.2%	0	333	411	0	0
2026-03	77,681	1,613	2.1%	0	332	1,281	0	0
2026-04	82,250	626	0.8%	0	418	208	0	0
2026-05	222,609	13,059	5.9%	0	337	12,722	0	0
2026-06	105,313	1,728	1.6%	0	463	1,265	0	0
2026-07	131,393	6,755	5.1%	0	490	6,265	0	0
2026-08	108,082	4,633	4.3%	0	324	4,309	0	0

*All failure statuses are customer/CITC outcomes — a terminal status proves Salam’s platform delivered the request. The May-2026 spike coincides with the request-volume spike (222k), not with a Salam fault. Salam-IT Nafath issues would appear as failed API calls to Nafath, a different (7-day) source.

Sources: application replica (eligibility_logs · activation_logs · nafath_logs · onboarding_orders), extracted day-sliced and throttled on 25 Aug 2026; PII masked at extraction. Companions: Salam-Payment-Errors-Catalog (12mo), UPG monthlies, Journey-Errors monthly workbooks, Digital-API weekly catalog.
